The Commercial Life is the only Life Insurance Company with its Head Office in the Province of Alberta. This means that every dollar of every premium paid to The Commercial Life in the Province of Alberta is used in the development of the Province of Alberta.

Commercial Life funds are invested exclusively in the territory in which it is operating. Commercial Life money has already built or assisted to build and develop over 60 School Districts in the Provinces of Alberta and Saskatchewan.

Call at our Head Office and see what it means to have the Head Office of such an institution in this country.

We are continuously enlarging our field organization and will be glad to discuss an appointment with reliable men who are desirous of entering a worthy and highly remunerative business in which there is splendid opportunity for advancement. Previous experience in Life Insurance is not necessary, but integrity, perseverance, and courage are necessary.

Introductory

THIS NINETEENTH issue of the Greater Edmonton City Directory comprising the City proper, and all suburbs is presented to the public with the belief that it will meet the demands of the most exacting and will fulfill the requirements of all its users.

The information in this book is gathered as far as possible by actual canvass, and is compiled in a way to ensure maximum accuracy. While the publishers will in no way be held responsible for any errors that may occur, they will be glad to have any inaccuracies brought to their attention, so that they may be corrected in succeeding editions.

The canvass for the present book was made under favorable conditions, with a crew of efficient canvassers, under the immediate supervision of carefully trained examiners.

The results of the canvass were most satisfactory and the manner in which the information checked in, proved the thoroughness of the work.

Upon examination and use as a work of reference, the directory will be found to contain a thorough and complete store of information regarding all the interests of the city. It is devoted to the advancement of all the city's vital interests and has in each issue kept pace with its progress.

Through the exchange of directories with the various directory libraries throughout the United States and Canada and the sale of the Edmonton Directory to many institutions, hotels and stores in large cities, the directory is circulated throughout the country and serves as a lasting advertisement for our city.

The canvass for the Edmonton Directory includes the entire City, so that the name of each person employed should be taken twice; once at the dwelling and again at the place of business. After the canvass has been completed, this information is compiled and it is necessary that there be two slips for each person employed. The information taken at the residence and place of business is compared before the duplicate is laid aside. When a discrepancy is found, a special messenger is dispatched to correct the conflicting information, or if the name has not been taken at both places, to retake it at the home or business place.

The new information is checked with the previous directory and each name in the old directory is accounted for.

It is this careful superintendence and revision which makes the directory estimate of population higher than the census figures.

The directory estimate of population is based on the actual number of names contained in the book, which is multiplied by a common multiple to allow for the married women and small children whose names do not appear.

Based upon the names contained in the pages of this book, it is estimated that the population of Greater Edmonton is 72,961. This includes considerable territory beyond the city limits, which is canvassed in order that the names of all people doing business in Edmonton may be obtained for the directory.

The Publishers desire to thank their patrons and the general public for the courtesy extended at all times to their representatives, and to express their appreciation for the confidence which the business and professional men of Edmonton have always shown in their publications.

Respectfully, The Publishers,

September 25th, 1924.

Edmonton

Edmonton, the Capital of Alberta is located on the North Saskatchewan River about two hundred miles east of the Rocky Mountains. At this point the river is flanked by high banks covered with spruce and poplar, or by broad open flats which provide splendid sites for parks and recreation grounds. The situation is ideal from the standpoint of landscape beauty, and as wealth and population increase Edmonton will rank as one of the beautiful cities of North America.

Edmonton holds the key position geographically to about one-quarter of the area of Canada, comprising the Valleys of the Saskatchewan, Peace, Athabasca and Mackenzie Rivers, and the great hinterland of North-West Canada. The extension of the Canadian National Railways to Prince Rupert has added Northern British Columbia to this area as well as giving a short route for the products of the Prairies to the Yukon.

In the days of the fur trade many posts were built along the Saskatchewan River. Edmonton alone has survived and is developing into a great commercial metropolis because it is a natural trading centre. Ninety-five wholesale and jobbing houses are at present engaged in the distributing trade of the city. Its strategic position in Western Canada becomes more and more apparent as the city and the great territory it serves develops.

It is the meeting point of three trans-continental lines of railway, and the most important railroad centre on the Canadian National Railway System between the Great Lakes and the Pacific Ocean. There are over 1,650 Canadian National Railway employees who make their homes in the city. The annual payroll for these employees is over two and one-half million dollars. Over 3,000 freight cars are handled daily in and out of Edmonton by the Canadian Pacific and Canadian National Railways.

Edmonton lies opposite the lowest pass through the Rocky Mountains on the continent, and thus will draw through its gates the greater portion of the trade between Alberta and British Columbia, two of the richest provinces in Canada in natural resources.

The vast supplies of raw materials of the territory surrounding Edmonton form a basis for extensive manufacturing industries. The cost of living will always be reasonable because of the great production of food-stuffs: wheat, flour, meats, fish, poultry, eggs, butter, cream, cheese, milk and vegetables.

Edmonton is the centre of a great coal industry. Some forty-five coal mines are in operation within a radius of fifty miles of the city, several being within the city limits. The number of men employed in the various seasons of the year is over 1,400, and the annual production about one-and-one-half million tons. The payroll aggregates about two-and-one-half million dollars per year.

Beyond Edmonton, but well within its trading radius, lie the wonderful bituminous mines of the Mountain Park, Jasper and Yellowhead fields, producing

annually about two million tons of high-grade steam coal, and employing over 1,200 men. The market for these coals is steadily growing and Alberta coal is displacing American coal in Eastern markets.

Edmonton lies on the edge of one of the greatest natural gas fields in America. The field extends in a broad zone from the Peace River, north-west of Edmonton, in a south-easterly direction across the Province to the Battle River, and beyond to the inter-provincial boundary, a distance of over 300 miles. The city is supplied with gas from the Viking-Wainwright portion of this field, which lies about eighty miles east of Edmonton.

The Northwestern Utilities Company, Ltd., has constructed a pipe line from this field to the city. The Company has nine producing wells completed, with a tenth nearly completed. The estimated flow per well being 4,000,000 cubic feet per day with a rock pressure of 715 lbs. The area of the wells in question extends to 27 square miles which ensures a gas supply ample for the requirements of the city for at least a period of twenty years. Additional to this area, however, known as the Viking area, there is a further region known as the Fabyan, 30 miles South of the Viking area which promises to prove a still larger gas reservoir, so that the future supply of gas for the city seems absolutely assured.

While the aim of the Company is primarily to cater to the domestic consumer, to whom the use of gas appeals, it is anticipated that the supply is of such adequate proportions that manufacturing concerns will largely benefit by the use of the gas supply, the rate for which though at present fixed at 30 cents per thousand cubic feet, may subsequently be reduced so that the larger manufacturers may take advantage of the utility. Within the city the gas will be distributed from mains extending to seventy-five miles. The domestic rate is fixed for the present at 46½ cents per thousand cubic feet.

In the Edmonton Timber Agency there are twenty-seven sawmills operating under license and ninety-five small portable sawmills under permit. The lumber cut in the city in 1922 was about twenty million feet. During the past winter the log cut along the rivers and railways of the Edmonton District was about fifty million feet. About two-thirds of these logs are rafted down the Saskatchewan to Edmonton, or down other rivers to convenient points on the railways and hauled to Edmonton. On the west side of the Rocky Mountains, in British Columbia, a territory tributary to Edmonton, the log cut for the past season was about the same as in Alberta. The industry gives winter employment to about 3,000 men. In addition, there is a regular winter industry of cutting railway ties, lath, shingles and mine props, which gives the homesteader an opportunity of earning extra money. The complement of the lumber industry is found in several wood-working factories, manufacturing sashes and doors, dressed lumber, and

other building supplies. Two box factories in Edmonton do a flourishing business.

The clays and shales of the District make excellent brick and tile. Several brick factories in the City and vicinity are being developed as the needs of urban and rural settlement require. West of Edmonton, at Marlboro, cement is made and finds a ready market in the city and throughout the Province. Some of the clays are very suitable for pottery and other ceramic products.

17,000 sheep passed through the yards. The total number of hogs handled by the stock yards and packing plants of the city reached the grand total of nearly 200,000 last year. Notwithstanding

Flour milling was the first industry in Edmonton. It still holds an important place and has a prosperous future, particularly as a result of the coming development of the Western Grain Route. Famous brands of oatmeal are manufactured because of the unexcelled quality of Alberta oats. The manufacture of several cereals and mill feeds is beginning, with prospects of becoming a considerable industry.

This industry began in a modest way over twenty years ago and the pioneer firm, Gainer's Limited, has made substantial progress commensurate with the growth of the live stock industry. In 1907 the Swift Canadian Co. Ltd., a branch of Swift & Company, of Chicago, established the first big packing house in Edmonton. A few years later P. Burns & Co. Ltd., the great pioneer packing house of Alberta, followed.

These industries employ about eight hundred hands, and provide a market for thousands of cattle, sheep and hogs each year. The three packing plants have doubled their capacity and output the last ten years. Edmonton is well situated for this industry and a great expansion is inevitable. Side by side with the packing houses the Edmonton Stock Yards have been established. In 1922, 104,000 cattle, 76,000 hogs and the low prices of cattle during the last season over four and one-half million dollars was paid to the farmers of the district for live stock.

During the last few years many new industries have sprung up in the city because of the ready supplies of raw materials, and because of the local demand created by a city and district of 400,000 people, and the possibility of meeting that demand by local enterprise and capital. Prominent examples are the manufacture of men's heavy clothing, women's and children's wear, iron, steel and sheet metal products, fence wire, furnaces, drugs, chemicals, brooms, cigars, soaps, candies, beverages, fur garments, boats and canoes. The success that has attended the establishment of these industries indicates the possibilities of industrial expansion in the City of Edmonton. The vast stores of coal and natural gas so easily available hold the possibilities of cheap power for manufacturing industries as well as the possibilities of several new industries growing out of the numerous by-products of the Edmonton coals. As the population of Edmonton and the rich district surrounding it increases, manufacturing opportunities will expand to meet the needs of a highly progressive community. Man-power and money-power applied to the natural wealth of Central Alberta will transform the province into a great industrial area equal to any other on the American Continent.

There are at the present time about 120 factories, large and small, which are all now on a permanent and success-

ful basis. The next ten years will be much more favorable to the establishment of manufactures in the district than in any previous period. A factor to be considered in this connection is that the population of Edmonton includes many people from the Old Country who are industrially trained and thus provide a supply of intelligent workers in new industries. By the last Dominion census the number of industrial employees in the city is placed at over 4,200, and the annual output of manufactured goods valued at \$32,000,000.

Edmonton is the seat of the Provincial University. The registration for 1922 in this institution was over 1,300 students. Degrees are granted in arts, science, agriculture, engineering, medicine, pharmacy, law and commerce.

There are over forty-eight Protestant public schools and eleven Roman Catholic separate schools, four high schools and the Technical high school. The school population has doubled since 1913, and is now 14,580. At the present rate of growth the School Board of Edmonton must build a new eight or ten roomed school every year. Other educational institutions that illustrate the importance of Edmonton as a centre of learning are Robertson Theological College, Presbyterian; Alberta Theological College, Methodist; St. John's Oblate College and Edmonton Jesuit College. For young women there are Westminster Ladies' College, Alberta College South, and four Roman Catholic Convents. Business and commercial training are given by the Commercial High School, (part of the public school system) and three business colleges, Alberta, McTavish and Elston.

Men's and women's clubs are represented by the various forms of organizations found in modern cities of the continent. Sports of various kinds are well organized. Of winter sports hockey is the most popular. There are literally scores of amateur hockey clubs in different parts of the city, while the Edmonton Hockey Team, professional, won the championship of Western Canada in 1923. Curling and skating rinks are found in every section of the city. Ski-ing, snowshoeing and tobogganing afford exhilarating and healthful exercise. The popularity of winter sports is the best testimony of our splendid winter climate. Tennis, soccer and baseball are the most popular games in summer. The Edmonton Rugby Team won the championship of Western Canada in 1921 and 1922. There are three golf courses in the city, and the game has taken a firm hold. Lawn bowling is growing in favor.

Basketball is popular, and the Commercial Graduates, all past students of the Commercial High School, hold the Championship of the World in Basketball, having defeated the Cleveland Favorite-Knits in Edmonton, June, 1923, Chicago Uptown Brownies and Warren National Lamppes, October, 1923, with an average attendance of 6,000 people at each game of each series.

There are over eight hundred acres of public parks situated in different parts of the city, as well as several excellent children's play grounds. Two of these parks are provided with splendid swimming pools, which afford delightful recreation daily to hundreds of adults and children. The average attendance for the season is 1600 a day in each pool. A third pool is conveniently located in the West End residential district.

Several lakes in the vicinity of Edmonton provide excellent summer resorts and are easily reached by motor

or by train. Summer tourists will find a camp site conveniently situated within the city.

The water supply is taken from the North Saskatchewan River through two 36-inch intakes into the pump station on the north bank of the river. At the pump station there are two six-million gallons and one eighteen-million gallons low lift centrifugal steam-driven pumps, one six-million steam-driven centrifugal high lift pump, and two ten-million electric high-lift pumps. The pressure on the higher street level is from 40 to 45 pounds and on the lower river flats from 95 to 100 pounds, while at the pump station from 105 to 110 pounds is maintained. The pressure for fire fighting is raised by the Fire Department's own booster equipment.

The Filter Plant comprises sixteen Roberts Gravity filters of one-half millions gallons each, the sedimentation basin and two clear water basins.

The system stands capitalized at \$2,405,701.00, the annual revenue for 1920 amounting to \$429,141.00.

Today the system is comprised of 167 miles of 4-inch to 30-inch water mains, 11,729 water services, 813 fire hydrants. About 400 new services are being added each year.

The daily consumption of water averages 6,215,000 gallons, or a per capita consumption for all purposes of 95 gallons per 24 hours.

The Department is managed by a superintendent and office staff of 14, with offices on the second floor of the Civic Block, and an outside construction and maintenance gang under a general foreman.

About 80 per cent. of the services are on meter, the following tariff as revised being in effect on April 15th, 1921

Henderson's Edmonton Street and Avenue Directory for 1924

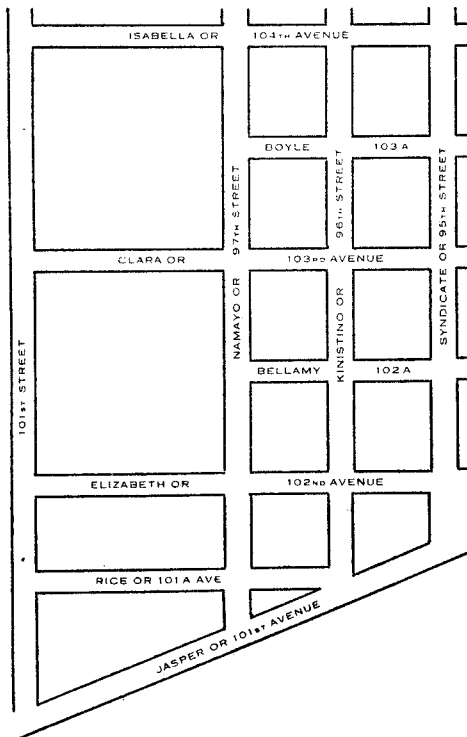

All Numerical System of Street Naming and House Numbering Plan

Streets run North and South, odd numbers South side ; Avenues run East and West, odd numbers East side.

Streets are numbered from the East. Avenues are numbered from the South. Old 1st Street is 101st Street. Jasper Avenue is 101st Avenue.

Short avenues and short streets have an A number.

The East and South have the small numbers. The North and West parts have large numbers.

The original names of the following Avenues and Streets have been retained in this issue of the Directory: Jasper Ave., Main St., Stony Plain Road, St. Albert Road, Fort Road Saskatchewan Drive and a few lesser known streets.

Examples House Numbering

1. 10312 on 96th Street. 12 is the house number as it is the last two figures. 103 is the First Avenue south of that block on 96th Street.

2. 10348 on 95th Street. 48 is the house number, 103 is the Avenue south, 95th Street.

3. 9624 on 102nd Avenue. House No. 24, 96th Street is the first street east of that house. The house is between 96th and 97th Streets.

NOTE—The arrangement of the following Street and Avenue Directory is in numerical order, with avenues preceding streets. Avenues and streets not numerically named appear first in Alphabetical Order. The arrangement by directions is East, West, South and North.

Where the odd and even numbers on an Avenue or Street are separated the South Side (odd numbers) on Avenues appear first, and the East Side (odd numbers) appear first on Streets.
